Introduction

Although statistical information for the Northwest Territories serves an important role in describing trends in demographic, social and economic conditions, these territorial indicators do not always reflect some of the differences that exist among communities in the Northwest Territories.

This document is intended to provide a summary of current selected demographic, social and economic statistics for areas of the Northwest Territories and its communities. Although a wide variety of subject areas are covered, the document is not intended to contain all community information that is available. Sections included in the profile are:

- population estimates
- vital statistics
- size of household
- household tenure
- family structure
- core housing need
- crime & crime rates
- income assistance
- traditional activities
- aboriginal languages
- education levels
- historical labour force activity
- selected 2016 employment rates
- summary of 2016 labour force activity
- employment profile
- total personal income
- employment income
- income distribution
- family income
- prices
- community living
- environment

The document is organized into four sections. Following this section, the second section contains the information for each NWT community. In this section communities are organized alphabetically by region. The third section contains same socio-economic information for three aggregations of communities: (i)

regional data; (ii) communities summarized into categories associated with the socio-economic agreements signed between the GNWT and the diamond industry, and (iii) community type. The final section of the report describes the communities that are included in each of the aggregations presented with the regional data and provides sources and definitions for the variables included in these summaries.

If statistical information for NWT communities is required that is not contained in this document, it is recommended that users visit the NWT Bureau of Statistics web site at <http://www.statsnwt.ca> or call (867) 767-9169.
