

Monthly Labour Force Activity - September 2017-

Overview

Labour force information released today by Statistics Canada indicates that the Northwest Territories' employment rate was 67.2% in September 2017. This marked a slight drop from August following three months of consecutive increases in the employment rate.

In all, 21,700 persons were employed, a decrease of 300 persons over the previous month. The drop in employment levels in September follows historical trends when summer students return to school and the end of the fire season.

National highlights

Nationally, the employment rate in Canada dropped slightly to 62.2% in September 2017. Among the provinces and territories, Yukon maintained the highest employment rate at 75.0%, followed by the Northwest Territories (67.2%) and Alberta (66.9%). Newfoundland & Labrador and Nunavut had the lowest employment rates at 51.6% and 54.8%, respectively.

Employment rates by key demographic characteristics

In the 12 months to September 2017, employment rates in the NWT dropped across most of the key demographic characteristics. The exceptions were Non-Aboriginal persons and persons aged 15-24 whose rates increased by 0.1 and 1.9 percentage points, respectively.
