

Northwest Territories Population April 2024

On April 1, 2024 Statistics Canada estimated that 44,920 people were living in the Northwest Territories. Between April 1, 2023 and April 1, 2024, the population in the Northwest Territories increased by 242 persons. The components of natural increase during this one-year period consisted of 507 births and 331 deaths, resulting in a net increase of 176 persons. There was a net loss of 625 interprovincial migrants and a net gain of 691 international migrants.

In the NWT, population growth fluctuates based on migration patterns; generally, net interprovincial migration has been mostly negative, offset by positive net international migration and natural increase. NWT's net international migration has been on an increase since late 2020. In the second quarter of 2024 it reached its highest level since the availability of comparable data (third quarter of 1971) (Figure 1).

Figure 1 Migration Patterns and Population Growth, Northwest Territories, April 1, 2019 to April 1, 2024

At the national level, between April 1, 2023 and April 1, 2024, Canada's population increased by 3.2%. Alberta experienced the largest population increase followed by Ontario and British Columbia, all exceeding Canada's growth.

The historical detailed components of population change for the Northwest Territories are presented in Table 2.

These population estimates are based on the 2021 Census, adjusted for census net undercoverage. Data may be revised over the coming years, and it is possible that trends will change as a result of future revisions.

Note: 1. Net International represents the net total of all Immigrants, Emigrants, Returning Canadians, Non-Permanent Residents and Individuals Temporarily Abroad.

2. Error of Closure represents the difference in population change as measured by the individual components of growth and that observed using 2021, 2016, 2011 and 2006 census-based population estimates.
