Northwest Territories Population July 2022

On July 1, 2022, Statistics Canada estimated that 45,605 people were living in the Northwest Territories, of which 23,450 (51.4%) were males and 22,155 (48.6%) were females. Historically, in the NWT, there have been more males than females. Nunavut, Yukon, Saskatchewan, Alberta and Quebec also have higher proportion of males in the population, while all other provinces have a higher proportion of females in the population.

The population pyramid in Figure 1 illustrates the aging of the NWT population between July 1, 2012 and July 1, 2022. Although the median age rose from 32.5 to 35.8 years in the past 10 years, the population remains relatively young. By comparison, the median age for Canada rose from 40.1 to 41.0 years over the same period.

Figure 1 Population Distribution, by Age and Sex, Northwest Territories, July 1, 2012 to July 1, 2022

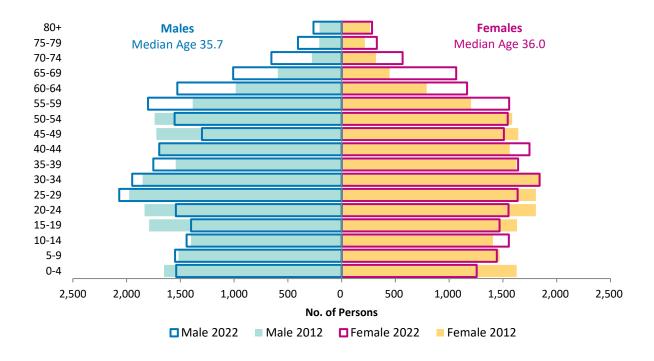

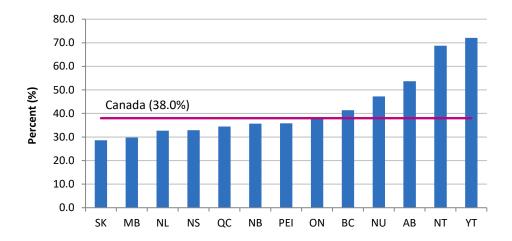

Figure 2 demonstrates the growth of senior population – those aged 60 and older. Between July 1, 2012 and July 1, 2022, the increase in the seniors population in the NWT (+68.8%) was the second largest after Yukon (+72.1%), while at the national level, the seniors population grew by 38.0% during the same period. Saskatchewan (+28.6%) saw the smallest growth of senior population in 10 years. The proportion of seniors in the population varies from one province/territory to another – ranging from 7.6% in Nunavut to 31.7% in Newfoundland and Labrador. NWT has the second smallest proportion of those aged 60 and older at 15.9% compared to Canada at 25.6%.

Figure 2 Growth of Seniors Population
Northwest Territories, July 1, 2012 to July 1, 2022

Overall, Canada's population increased by 1.8% between July 1, 2021 and July 1, 2022 (Table 1). All jurisdictions saw population increases with Prince Edward Island experienced the largest growth of 3.6% followed by Nova Scotia (+2.9) and New Brunswick (+2.7).

Between July 1, 2021 and July 1, 2022, the population in the Northwest Territories was virtually unchanged. The net loss from interprovincial migration of 517 persons moving to other provinces and territories was almost completely offset by natural increase (births less deaths) and international inmigration.

The detailed components of population change for the Northwest Territories since 2011 are presented in Table 2.

These population estimates are based on the 2016 Census, adjusted for census net undercoverage. Data may be revised over the coming years, and it is possible that trends will change as a result of future revisions.

For more information about these estimates or for community level population estimates and projections, please visit the NWT Bureau of Statistics website at http://www.statsnwt.ca or call (867) 767-9169.

Note: Net International represents the net total of all Immigrants, Emigrants, Returning Canadians, Non-Permanent Residents and Individuals Temporarily Abroad.

Error of Closure represents the difference in population change as measured by the individual components of growth and that observed using 2016, 2011 and 2006 census-based population estimates.
